

Post-Discharge Screening Program

40%

Inpatient Population > 50 years of age with high-risk for OSA¹

22%

CHF Readmission Rate²

20%

Medicare beneficiaries readmitted within 30 days of discharge with COPD²

78%

Hospitalized cardiovascular patients had sleep apnea³

\$9,051

Average cost of CHF readmission⁴

CHRONIC DISEASE MANAGEMENT

Identifying high-risk inpatient populations and initiating care

MedBridge Healthcare, LLC partners with a leading post-discharge management company to provide a post discharge screening program for high-risk patient populations. The purpose of our post-discharge program is to simplify the process for identifying, diagnosing and initiating appropriate therapy with specialized monitoring post-discharge. This patient-centric approach to care is designed to reduce hospital readmissions and drive down the overall cost of care for patients.

MedBridge Healthcare is a leading provider of sleep diagnostic testing services and a pioneer of innovative sleep programs developed to bridge the gap for a changing climate in healthcare. MedBridge partners with healthcare providers and systems intent on progressing sleep medicine within their care communities. Together, we can provide a new standard of care.

Hospital Readmissions Reduction Program (HRRP) reduces payments to 30-day readmissions for the following conditions or procedures:

1. Acute Myocardial Infarction (AMI)
2. Chronic Obstructive Pulmonary Disease (COPD)
3. Heart Failure (HF)
4. Pneumonia
5. Coronary Artery Bypass Graft (CABG) Surgery
6. Elective Primary Total Hip Arthroplasty and/or Total Knee Arthroplasty (THA/TKA)
